User-centered Design

Praveen Kumar

UI/UX Designer

Bengaluru, Karnataka, India

Summary

I'm a UI/UX Designer and Product Designer passionate about building scalable, user-centric, and conversion-driven digital experiences for SaaS and AI products. My expertise lies in combining user research, interaction design, design systems, and usability testing to create intuitive and impactful solutions.

At Revlitix, I led the UX design of AI-powered SaaS features—driving a 25% lift in product adoption—and developed a modular design system that streamlined design-to-development handoffs by 25%. I also designed conversion-focused Webflow landing pages that increased conversion rates by 12% and accelerated campaign launches by 50%.

Previously at DSG, Inc., I spearheaded the redesign of a flagship product, significantly improving usability, accessibility, and task completion rates. With a strong foundation in front-end development (HTML, CSS, JavaScript), I excel at bridging design and engineering teams to ensure seamless implementation.

My toolkit includes Figma, Webflow, wireframing, prototyping, usability testing, accessibility standards, responsive design, and design systems. I specialize in SaaS UX, conversion rate optimization (CRO), and human-centered design, aligning business goals with user needs to deliver measurable outcomes.

I thrive at the intersection of UX design, product strategy, and front-end collaboration—and I'm excited to contribute to product teams building the next generation of SaaS, AI, and web platforms.

Experience

Candescent

UI/UX designer

September 2025 - Present (11 months)

Bengaluru, Karnataka, India

Revlitix

UI/UX Designer

March 2023 - September 2025 (2 years 7 months)

Bengaluru, Karnataka, India

- Spearheaded UX strategy for AI-powered SaaS features (Insights, KPI Projections, Workflows) → drove +25% product adoption
- Designed and implemented a modular design system in Figma → streamlined design-to-development handoff by 25%
- Conducted user research, usability testing, and prototyping → enhanced task efficiency by 20–25% through human-centered design
- Partnered cross-functionally with engineering, product management, and data science teams to deliver 5 major SaaS product features (Sonic AI, Workflow Automation, Alerts, KPI Projection, RCA)
- Built and optimized Webflow landing pages with conversion-focused UX → achieved 12% lift in conversions & enabled 50% faster campaign launches

DSG, Inc.

UI Developer

June 2021 - November 2022 (1 year 6 months)

Bengaluru, Karnataka, India

- Led a product redesign using user-centered design principles → significantly improved usability, accessibility, and task completion rates
- Developed responsive front-end interfaces with HTML, CSS, and JavaScript → bridged collaboration between design and engineering
- Optimized web performance and accessibility → reduced bounce rates & boosted WCAG accessibility scores

IQVIA

Intern

March 2020 - October 2020 (8 months)

Bengaluru, Karnataka, India

- Verified client data to ensure accuracy and consistency across the client portal.
- Conducted thorough data cleaning, enhancing the reliability of client records.
- Updated and maintained client information, contributing to improved operational efficiency.

- Developed strong attention to detail and data management skills in a fast-paced environment.

Education

Kristu Jayanti College Autonomous

Bachelor of computer Application, Computer Science · (2016 - 2019)
